To All Water Users of the Lower Jordan River Distribution System:

The annual water users' meeting with your committee and the State Engineer was held January 25, 1972, and arrangements were completed for the distribution of the waters of the Lower Jordan River for 1972. J.E. Johnson, who served as water commissioner in 1971, was recommended to us by your committee and will be reappointed as water commissioner for 1972.

Due to the healthy financial condition of the system, it was decided not to levy an assessment against the individual water users in 1972 but rather to spend a portion of the reserve funds to cover the costs of distribution.

We are clearing our books on this system this month and wish to remind those having delinquent accounts for 1970 outstanding that these should be paid immediately. As of February 29, 1972, we will turn these accounts over to the Attorney General for collection.

We trust that this arrangement is satisfactory to all.

Yours truly,

Donald Norseth
Hydrologic Engineer
